DecoMark™ spill

geveko-markings.com

Imaginitive play
The only limitation is your imagination

Dark and boring surfaces are not particularly inspiring for children to play on. So why not brighten up such spaces with colourful and creative designs to make the playground something special?

DecoMark™ provides a quick and easy solution for individual designs of games, logos and much more. In fact, it's all up to your imagination!

Don't chalk - just play

There is no need for chalk to constantly draw up games at the playground. With our preformed thermoplastic material you get permanent applications that encourage children to be active whilst having fun. By creating creative and durable surfaces in bespoke designs, we believe that Decomark is the ideal option, when school or municipal playgrounds need refreshing.

Active and safe learning

DecoMark allows interactive play for active children. The material's steadfast colours are retained regardless of weather conditions and frequency of use. They provide a firm foundation for active and educational play. You do not have to worry about safety issues either. Our high friction materials minimise the risk of slippery surfaces and make it a safe place for the children to play.

Whether it be to encourage counting or reading, or simply for play, DecoMark provides the perfect solution. Designs can be supplied in a preformed, easy-to-lay 'kit' or in packs of sheets, lines or rolls for bespoke application.
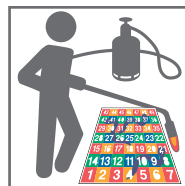

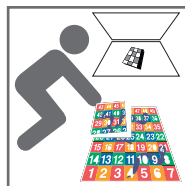

Application is fast and easy as it requires only one person, a broom and a heat torch! Simply sweep off the surface, apply the material and use a heat torch to secure the material to the road surface. It's that simple!

In other words, no major budgetary or machinery considerations are needed when choosing our decorative thermoplastic solution. Though specialised equipment is not necessary, you can optimise the performance of your preformed thermoplastic by using the QL2™ Pro heat torch.
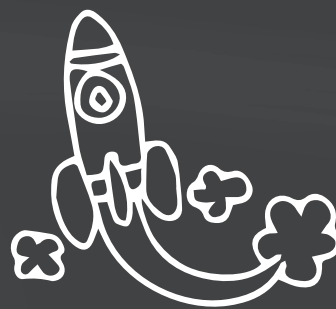

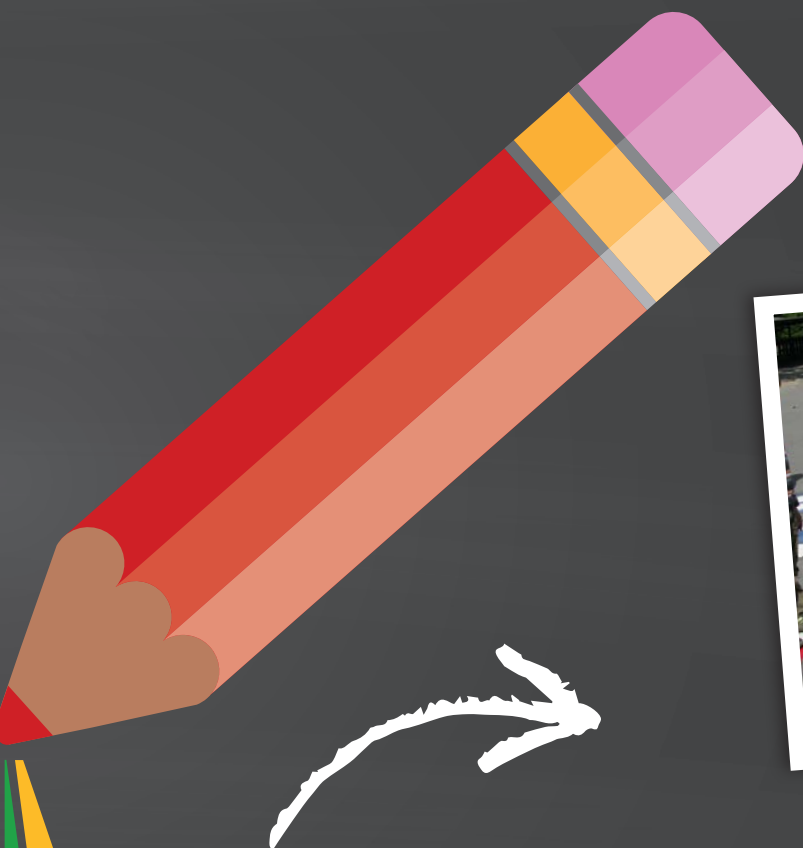

'Learning starts at the school gates, not just in the classroom'.

DecoMark™ Easy

Some symbols and markings are made as DecoMark Easy. In this case, the individual pieces of the marking are glued together on the backside with a compatible material. This gives you perfect control over complex signs and saves application time when installing complicated signs.

Colourful with high UV resistance

DecoMark is available in a wide variety of standard colours, providing you with a range of possibilities to create decorative and inspiring designs. Moreover, the composition of the thermoplastic material makes the UV resistance high so that the colours stay brighter for longer.

Flexible and durable

Even smaller details and curving shapes are possible with the flexible DecoMark material. Although DecoMark is a thin material, it is a durable solution when decorating surface areas. This gives you years of benefit from your creative designs.

Environmentally friendly

DecoMark emits no environmentally harmful substances, either during or after application nor at the time of removal. The pigments used in the material are all organic and do not contain lead or other heavy metals. Making your creative markings with DecoMark thus minimises the risk of skin problems and allergic reactions.
